# MAKE DETAILS MATTER

Cesar Dot is the small but versatile luminaire family that provides recessed accent lighting with in-ground, wall or ceiling mounting options. Highlight architectural details, mark walkways, illuminate staircases and steps, or emphasise objects and features: with a choice of luminaire sizes, beam angles and colour temperatures, Cesar Dot's compact design offers powerful, flexible performance.

With its stainless steel construction and absence of visible screws, Cesar Dot provides a sleek finish – and, thanks to high corrosion resistance and ingress protection, it's long-lasting too.

The in-ground luminaire is available in two sizes and a choice of three beam angles. The wall recessed version also offers a choice of two sizes, and uses a purpose-designed asymmetric optic to ensure light is only distributed where needed and minimise glare. The ceiling luminaire completes the package, available in the medium size with a medium beam angle.

The wall-mounted and in-ground variants are supplied with a polypropylene recessing box, plus O-rings for fixing, and the ceiling recessed variants are supplied with two clips for easy installation into plasterboard ceilings.
