96633430 CHAMPION LED MEMORY SETTING

THORN

Champion

This ring is for fixing on the stirrup before the product is installed on its support. Once the aiming is finalized this accessory needs to be tightened, and it allows memorizing the tilt position. Then, when the maintenance and cleaning of the floodlight has to be done, the workers can tilt the product from 180° for cleaning, and they will find the original tilt position afterwards.
